Wesley Lack

VP - International Sales
Maximus

A self-made man in the hog industry for the past 18 years, Wesley Lack has a passion for people. Interact, impact what they are doing, seeing the results and provide them with a sense of success is what drives the man who has been instrumental in the fast expansion of Maximum Ag Technologies since its opening in 2013. Though his first goal was to impact a few farms on a daily basis, he realized what they were doing with a system like Maximus was not just impacting people at the farm level but also the whole livestock industry. This has been at the core of every decision he made since.

Lisa Butler

Software Solutions Manager

Maximus

Highly skilled and experienced Lisa Butler is a production software magician. Sixteen years at MetaFarms covering implementation, support and sales has allowed her to learn the industry from the ground up and really deepened her livestock management expertise. A marketing graduate from Normandale Community College, Lisa also has the ability to see the big picture, which has been an invaluable asset in the numerous projects she has helped implement.

Today, Lisa's whereabouts are hard to track. She loves bringing new technology to producers all over the world to help them grow and enhance productivity, protect herds and help keep them healthy.
